Agent de maintenance informatique et bureautique

More than a resume. A professional ready to make an impact. Certified in Cisco CCNA and CompTIA A+, I am looking for an opportunity in IT Support or as a Network Technician in Luxembourg.

What do I bring?

- **Strong IT support and troubleshooting skills**
- **Experience with hardware maintenance and user assistance**
- **Ability to work efficiently in fast-paced environments**
- **Experience creating procedures and delivering user training**
- **Fluent in English and Portuguese, with knowledge of French and Spanish**

My professional journey has taught me adaptability, problem-solving, and how to stay focused under pressure.

I'm not just looking for a job.

I'm looking for a team where I can contribute my technical skills, professional maturity, and motivation from day one.

Perhaps you're not looking for the perfect resume. Perhaps you're looking for the right person.
